

26 September 1958

Conference

STAT

Change angle speed of shutter to be decided
present least speed is 1/50 second.

Can do 2 frames/second but to be decided.
Senser is 2 ma on stand-by.

Can hold shutter open
Pulse operation only.

No knob for boresight 1/2 cycle

Same basic size of casting.

Additional optical trigger (building block) including sight (K-100 senser)
No solenoid.

Eymo mount out. Leica mounts for the 5 cameras. Probably can use 50 mm lens.

Plug-in amplifier. Is this necessary? In the shutter adjustment system!

No more total power drain.
Numbering device will be incorporated.

STAT

Program arrangement. None.

to talk with after his visit next week.
